Your Business

PROBLEM

Fraud & Compliance in
iGaming Operations

01

50% REVENUE LOSS

Caused by fraud (multi-accounting and bonus abuse) in 2021

Source: Marketline

COMMON PROBLEMS FACED BY iGAMING OPERATORS IN FRAUD & COMPLIANCE

PROBLEMATIC PLAYERS

Bot Players, Grinder Players, Player Collusion to abuse the system leading to financial losses

BONUS ABUSE

Players creating multiple accounts to claim bonuses and benefits

LIMITED MANPOWER

Lack of manpower to address security concerns and to improve security measures

FRAUD & COMPLIANCE MATTERS

Secure your site from hostile takeovers, detect problematic players, and suspicious activities on your iGaming site.

SOLUTION

E2 Fraud & Compliance
System

02

PROTECT YOUR INTERESTS

REAL-TIME REPORTING

Detect and respond to threats in a timely manner without affecting user experience

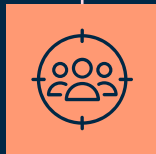

REDUCE LOSSES FROM FRAUD

Eliminate fraudulent activities like bonus abuse, credit card fraud and more

MONITOR USER BEHAVIOUR

Analyze user activity for potential issues like callusing, multi-accounting, and prevent account takeovers

IMPROVE 'FLAGGING' ACCURACY

Prevent false positives that cause delays, manual reviews, or even account suspensions

OUR CORE SOLUTIONS

We identify and store key characteristics for all devices that it recognizes, and assigns unique IDs with them.

DEVICE RECOGNITION

USER AUTHENTICATION

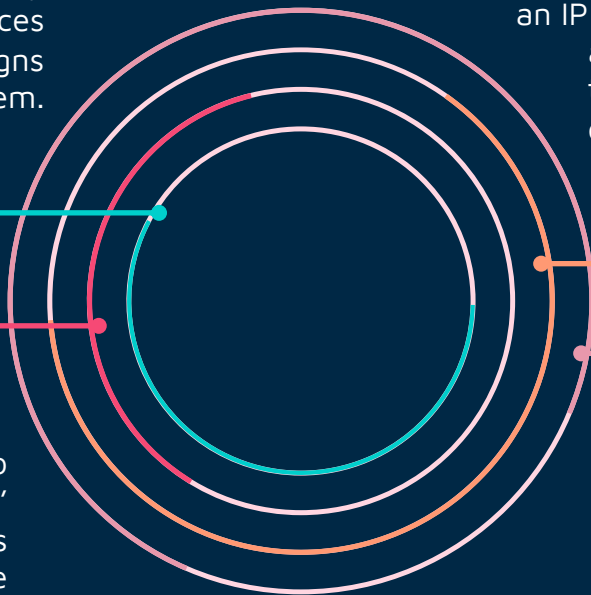

Our Authentication enables you to register devices with your users' account and later verify that users are logging in from the same devices.

We store relationship between a device, an IP and an account. If an E2 subscriber adds evidence of fraud to an account, the evidence associated with the IP, device, and accounts will be visible.

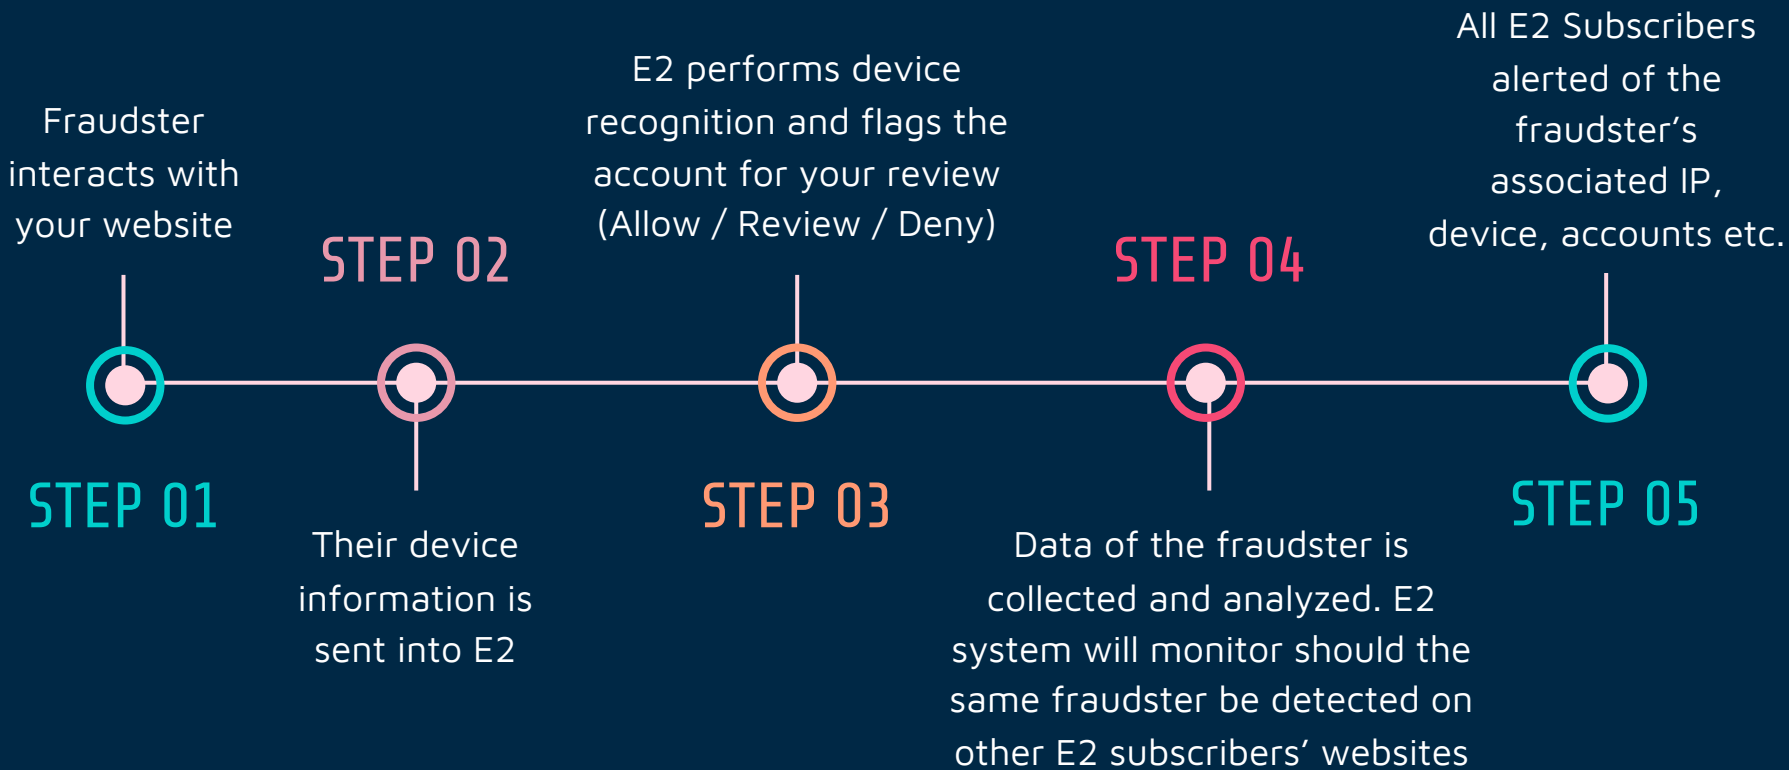

DEVICE ASSOCIATION

BUSINESS RULES

The E2 system will determine if a transaction is suspicious based on a series of tests and scoring them. It will then be flagged for you to 'Allow', 'Review', or 'Deny' to process the transaction.

HOW IT WORKS

E2 COMPREHENSIVE COVERAGE

EVENT TRACKER

Monitors user behavior across different domains and pages for tracing.

WATCHLIST

Tracks users who have triggered an alert and associates them with an IP or region.

E2 AI-POWERED PROTECTION

ADVANCED FRAUD DETECTION

Unique algorithm to analyze and score key data such as registration, login, transaction, and other on-site activity to identify potential fraud.

FINGERPRINTING TECHNOLOGY

detect fraudulent activity that may be unnoticeable to humans, such as credit card fraud, large-scale bot attacks, and login spamming.

MACHINE LEARNING

Keep pace with changes in the digital world and provide businesses with the most up-to-date fraud detection capabilities.

CUSTOM BUSINESS RULES

Customizable business rules editor allows businesses to create and manage their own fraud prevention rules.

MULTIPLE DATA SOURCES

Unique algorithm uses a combination of Device ID, and IP analysis to identify real users.

E2 BUILT FOR MANAGEMENT

MODULAR SYSTEM

Easily integrate into existing systems and workflows

SEAMLESS INTEGRATION

Top-grade API documentation and ready-made APP SDK.

FRAUD & COMPLIANCE AUDIT LOG

Detailed reports that provide transparency, fraud detection, and accountability.
